ELEARNING
SERVICES

AZIMUTH

A Complete Set of Services for Elearning

Azimuth provides your organization with all the services needed to create your elearning digital content. From the early stage of your course design to the online distribution of your course, Azimuth is here to help you.

Azimuth analyses your objectives, reviews the curriculum with you, storyboards your content, designs your graphics and animations, then realizes the voice-over, the localization, and even the packaging and the online administration.
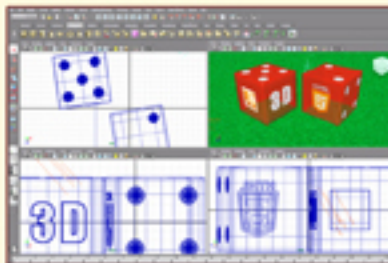

Conversion to HTML5

Azimuth also offers conversion solutions to help course providers transform existing content from various sources such as PPT or Flash into new HTML5 format. The company also specializes in developing animations using HTML5 and JavaScript.

3D Animation Development

Azimuth specializes in developing interactive 3D animations. Using UNITY, the company's skilled engineers and graphic artists design engaging interactive 3D animations to create a richer learning experience.

Affordable Open Source Solutions

Azimuth proposes cost effective open source solutions using Moodle LMS, PHP, MySQL, XML, HTML5, etc.
