

Azimuth: Pioneers and Experts in HTML5 for Elearning

HTML5 is the new standard of choice to develop multimedia content in elearning. HTML5 is easily recognized by all browsers and makes the portability of the very same course and content to different platforms easy.

Azimuth was an early adopter of the new HTML technology and has rapidly developed a team of experts that is now at your service for the development of a brand new elearning content or the conversion of an existing one.

Affordable and Effective Content Conversion to HTML5

Azimuth offers rare expert resources to quickly and affordably convert your existing content into the new HTML5 standards.

We take any preexisting content such as Flash or PPT and convert it into engaging, interactive and portable HTML5 elearning content.

Rich and Complete Conversion

Azimuth Expert Developers will guarantee a successful conversion by reviewing and enriching the XML code. The conversion is never just left to an automatic tool.

Special attention is directed to:

- Canvas and graphics development
- Audio / Video components
- Smooth CSS transitions

HTML5 AT THE HEART OF AZIMUTH SERVICES

These are just a few of the many developments and services that Azimuth can provide you;

- Conversion to HTML5 from Flash, PPT, Silverlight...
- Interactive Content in HTML5
- 3D Interactive Animations in HTML5
- Website Design and Development in HTML5 & CSS3
